Leïla Van Keirsbilck

PhD in Economics & MSc in Mathematical Engineering (UCLouvain)
Brussels, Belgium
leila.vankeirsbilck@uclouvain.be +32 496 81 71 51

Education

PhD in Economics, UCLouvain (CORE/LIDAM) Nov 2021 - Sept 2026
Thesis: *Econometrics of Financial and Economic Networks*

Committee: Francesca Monti (supervisor, UCLouvain, CEPR), Sophie Béreau (supervisor, UNamur), Domenico Giannone (Johns Hopkins University), Matteo Barigozzi (Università di Bologna), Marco Saerens (UCLouvain)

MSc in Economic Sciences, UCLouvain (ESL) Sept 2019 - Sept 2020
High distinction - Finance and Macroeconomics

MSc in Mathematical Engineering, UCLouvain (EPL) Sept 2012 - Sept 2017
Distinction - Applied mathematics

Research

Applied econometrics and macroeconomics, with a focus on econometric methods integrating networks and graph theory into macroeconomic and time-series analysis. Research institute: Center for Operations Research and Econometrics (CORE/LIDAM).

Working papers

The Transmission of Shocks Across Sectors and the Dynamics of Sectoral Prices
with Francesca Monti (UCLouvain, CEPR)
This paper explores the dynamics of U.S. sectoral producer prices in a large Bayesian vector autoregressive (BVAR) model where information from the Input-Output (IO) matrix is used to structure the long-run relationships between these time series.
ECB Working Paper Series, No. 3266 (2026), European Central Bank, available here & CEPR DP No. 20621.

Mapping and Sampling Impacts on Centrality Measures' Ability to Explain Financial Institutions Losses in Crisis Periods
with Sophie Béreau (UNamur) and Marco Saerens (UCLouvain)
This paper tests whether changes in the network mapping specification and changes in the sampling affect the econometric relation between losses and the systemic vulnerability of institutions determined by a centrality measure.

Import Tariffs and Sectoral Price Dynamics in an Input–Output BVAR for the United States
This paper aims to study the impact of tariff shocks on U.S. sectoral producer prices, using the IO-informed long-run BVAR framework.

Policy and Forecasting Reports

Contributor, *Perspectives économiques*, Regards économiques (UCLouvain)
Quarterly macroeconomic forecasting reports for the Belgian economy, produced within the Economic Analysis Service (SAE), March 2022 - present.
Responsible for inflation forecasts (sARIMA models) and thematic work on the Chinese economy.

Other Publications

Libéralisation du rail : qui va gagner, qui va perdre ?
with Olivier Malay (UCLouvain). IRES Discussion Paper 2019-3, UCLouvain.

Les multinationales en Belgique : contre-rapport annuel.
with Bruno Bauraind (Gresea) (2019). Gresea Échos, no. 99.

Teaching and Professional Experience

Lecturer - Emerging Markets Sept 2026 - Dec 2026
EDHEC Business School, Lille, France

Teaching Assistant in Economics Sept 2020 - Sept 2026
Université catholique de Louvain (UCLouvain), Louvain-la-Neuve, Belgium
Courses taught:
- Mathematics for economists (BA)
- Macroeconomics (BA)
- Applied macroeconomics (MA, MATLAB tutorials)
Teaching responsibilities include tutorials, grading, and student support.

Visiting PhD Researcher, Economics and Research Department Sept 2023 - Dec 2023
National Bank of Belgium, Brussels, Belgium
Conducted thesis research on the transmission of sectoral shocks to producer prices within the Bank's research team.

Researcher May 2019 - Jun 2019
Gresea (Research Group for Alternative Economic Strategies), Brussels, Belgium

Secondary School Mathematics Teacher Nov 2018 - Jan 2019
Institut Maris Stella, Brussels, Belgium

Presentations, conferences and other academic activities

Conferences:

- EEA (European Economic Association) 2025 (Bordeaux, France)
  The Transmission of Shocks Across Sectors and the Dynamics of Sectoral Prices
- IAAE (International Association for Applied Econometrics) 2025 (Torino, Italy)
  The Transmission of Shocks Across Sectors and the Dynamics of Sectoral Prices
- HYRCE (HEC Liège Young Researchers Conference in Economics) 2025 (Liège, Belgium)
  The Transmission of Shocks Across Sectors and the Dynamics of Sectoral Prices
- Workshop on complex systems, networks and finance 2023 (Nancy, France)
  Mapping and Sampling Impacts on Centrality Measures' Ability to Explain Financial Institutions Losses in Crisis Periods
- Doctoral workshops (UCLouvain)

Referee for peer-reviewed journals:

- International Journal of Forecasting
- BE Journal of Macroeconomics

Skills

Programming: R, MATLAB, Python, Dynare, LaTeX

Languages: French (native), English (fluent), Dutch (intermediate)
